

Victoria Nichole Huerta

Computer Scientist, Federal Bureau of Investigation San Antonio Division

Victoria Huerta is a Computer Scientist for the Federal Bureau of Investigation. Embedded on a highly collaborative cyber investigative team within the San Antonio Field Office, Victoria works closely alongside Special Agents to help further their investigations using skills and abilities to create sophisticated technological solutions and develop technical requirements to meet mission needs.

In her role, Victoria's subject matter of expertise on technical matters has been successfully applied to ongoing Cyber Criminal and National Security Cases. She is a Shared Division Resource, where her skills assist all other operational investigative teams on their cases and investigations. In addition, she participates in on-site search warrants to employ her technical expertise in the field with Digital Forensics and as part of DIVRT (Digital Imaging & Video Recovery Team).

Prior to her role as a Computer Scientist, Victoria served as an FBI Honors Intern while attending the University of Texas at San Antonio where she graduated with a Bachelor of Science in Computer Science with a focus on Computer and Information Security and a Minor in Cyber Security.
